

Cleanroom Swabs Absorbond® Series

TECHNICAL SHEET DATA

TX716 Absorbond® Micro TX759B Absorbond® Micro TX762 Absorbond® Long Handle

Description

Texwipe's Absorbond® Swabs Series is made from 100% polyester (hydroentangled) nonwoven material. The complete thermal bond construction eliminates adhesive contamination.

Cleanroom manufactured, made to exacting and consistent tolerances using high-precision automated processes. Lot coded for traceability and quality control. Packaged in a silicone-free and amide-free bag.

Features & Benefits

- Double layer of nonwoven polyester fabric for enhanced absorbency
- Hydroentangled polyester for use on sensitive surfaces
- Excellent chemical resistance for compatibility with a variety of solutions
- Cleanroom processed providing ultra low levels of particles, NVRs (non volatile residues) and ions
- 100% virgin polypropylene handle ensures no additional contaminants are introduced while offering excellent chemical resistance
- Autoclavable in dry heat and steam

Sampling

- 1. Nonwoven polyester head entraps contaminants in hydroentangled structure during sampling. This allows maximum contaminant capture and release into the diluent to provide for excellent recovery rates.
- 2. This swab is most effective with solvents other than water.

Applications

- Cleaning sensitive surfaces such as optical assemblies
- Solvent use (such as IPA)
- Cleaning of grooves, tracks, slots and other small spaces
- Appropriate for use with temperatures less than 410°F

Industries

- Biologics
- Medical Device
- Microelectronics
- Optics
- Pharmaceuticals
- Semiconductor

Products

See reverse for Physical and Contamination Characteristics

Sterile Available All swabs available in sterile upon request.
